REVENUE STATISTICS.

Synopsis of Internal Revenue Commissioner Evans' Report-Interesting Statis tics of the Affairs of the Postal Union. WASHINGTON, Nov. 5 .- The annual report of the Commissioner of Internal Revenue has been submitted. By the consolidation of collection districts an annual saving to the Government of \$125,000has been secured. The aggregate re-926,401. As a large number of those four tons, was taken out of the bonded abandoning their unlawful practices, the emptied, and left in a sugar-cane-field, commissioner has been strongly urged to where the officers found it the next day, recommend a proclamation of general am- with evidence that it had been crammed revenue laws in Indian Territory has been from the steamer's deck to the wharf, agents was 1,032,774,500, representing and his assistant, who was ignorant of \$162,657,114. The increase in the production of manufactured tobacco and snuff is over 9,000,000. Increase in production of cigars 186,000,000, and of cigarettes 98,000,000. The reduction of the revenue on tobacco caused by the act | accident it was discovered that the legs of 1883 was at least \$25,000,000. The \$3,725,913; allowed, \$3,524,167; rejected, in fruit cans, the can being divided into \$1,787. The remainder was returned for amendment. The distilleries operated this year number 5,120, consuming 18,644,787 bushels of grain. The decrease in the spirits produced is about 32,-000,000 gallons. The spirits removed in bond for export were 5,426,427 gallons; transferred to manufacturing warehouse, 203,938; withdrawn from warehouse, 83,-201,190; allowed for leakage and evaporation, 2,291,013. remaining warehouse June 30, 1883, 80,449,993. Seven-tenths of this is bourbon. In warehouse Oct. 1, 1883, 73,405,361 gallons; withdrawn for export for the first three months of the present fiscal year, 752,389 gallons. The distilled spirits in the United States except what may be in customs or bonded warehouses on the 1st of October, 1883, were nearly 116,000,000 gallons. The Commissioner recommends the with- the windows variegated fringes of tissue tack the brain or heart, causing apoplexy drawal of the privilege granted manufacturers of vinegar of separating alcoholic property from the fermented mash and us-

ing the same in the production of vinegar.

Aside from the above the report is an elab-

oration of the points presented in the Com-

Annual Report of Commissioner McFarland, of the General Land Office.

WASHINGTON, Nov. 3 .- The Commisfrom all sources connected with disposals of public lands were \$11,088,479, and from sales of Indian lands \$625,404, a total of \$11,713,883. Public lands were disposed of

	*101 CC+
Public sales	273,089
Private entries	179,955
Pre-emption entries	2,285,710
Mineral entries	31,520
Homestead entries	,171,914
Timber-culture entries	,110,930
Entries with military bounty land war-	
rants	45,411
Partules with land abrim garin	30 50 -

Total number of entries and filings posted during the year, 251,685; aggregating 30,-000,000 acres. The increase in the number of claims recorded in 1883 was 55,548 over the year 1882. The Commissioner states he is satisfied the pre-emption filings are the recommendation that the Pre-emption requring a period of not less than six months after the settlement of a claim has been placed on record before final proof shall be admitted, irrespective of the alleged time of residence prior to the entry. The report further recfects. The construction of 1,210 miles of land-grant railroad was reported during the year, making a total of 17,449 miles of road reported as constructed under all grants to June 30, 1883. The Commissioner asks that his salary be fixed at \$5,000 and for a moderate increase of the salaries of partment. The character and responsibilits business has increased 82 per cent. since | double reward. - St. Louis Post. 1881, appears to the Commissioner to justify this request.

Postal Union Statistics.

Blackfan, of the foreign mail service, shows pain-banisher. He makes this public. the relative rank of the principal postal union countries, as follows: The United States ranks first, with 44,572 post-offices; Great Britain has 14,318; Germany, 11,088; France, 6,158; Japan, 5,094. In respect of the relative population and the number of post-offices, Switzerland ranks first, having one post-office to 985 inhabitants; the United States one to 1,126; Norway one to 2,054; Great Britain one to 2,862.

In number of letters conveyed in the mails: Great Britain, 1,229,354,800; United States, 1,046,107,348; Germany, 563,225,-700; France, 533,541,373. In number of postal cards conveyed: United States, 324,-556,440; Germany, 153,992,200; Great Britain, 135,329,000; Austria, 39,931,800. In number of newspapers conveyed in domestic mail the United States ranks first, with 852, 180, 792; Germany, 439, 089, 800; France, 320,188,636; Great Britain, 140,789,100; Italy, 99,509,179. In number of letters dispatched in international mails Great Britain ranks first, with 46,051,500; Germany next, 42,195,260; France, 34,368,985; Austria, and the United States \$3,233,500, fifth, with 22,569,120. In respect to the length of the interior land routes other than railway the United States ranks first, with 231,306 miles; Russia has 77,804 miles; Germany, 44,702 miles; Spain, 37,202 miles, and Japan, 35,666 miles. In respect to the length of railway routes the United States ranks first, with 91,571 miles; Germany has 20,573 miles; France, 16,222 miles; Russia, 14,439 miles. In respect to the amount of gross postal revenue Germany ranks first, with 205,324,-215 francs; the United States, 194,630,444 francs; Great Britain, 175,690,000 francs; France, 152,968,569; Russia, 59,953,864. The net postal revenue in 1881 was as fol- OATS-No. 2.... lows: Great Britain, 68,523,100 francs; Germany, 29,407,305 francs; France, 19,100,-440 francs; Spain, 10,071,1000 francs. Smuggling Opium.

Opium is surreptitiously supplied by San Francisco Chinamen to their countrymen in the Sandwich Islands, where it is forbidden. The drug brings eighty dollars to ninety dollars a pound, and the smuggling of a few hundred pounds makes a Chinaman rich. In numberless ways they contrive to introduce it. A large safe was consigned to a prosperous merchant. An officer demanded the contraband trade, handled the linen in such a way that an an opium-can fell out. A great number of sewing machines were sent to Honolulu, and by were hollow and packed with opium. three compartments, the two outside ones filled with fruit and the larger one with opium. Large quantities have also been shipped to the Islands in stovewood, each piece of the wood being bored. Masses of coal have done service

Faithful Unto Death.

in the same way .- San Francisco Calt.

There stands on Third South street, Salt Lake City, an oddly-constructed house of two low stories, whose walls are covered with so many coats of whitewash that the nature of the material of which they are made is completely con- neuralgia. In every case they are painful; cealed. Plaster figures painted in in most instances, dangerous. Inflammabrilliant colors, flaming curtains and at tory rheumatism is likely to locate in some paper contrast fantastically with the dazzling whiteness of the walls, and conmust be extinguished—the supply must be vince the spectator that the owner of shut off. This can only be done by guardthe premises must be himself a singular ing the portals to the blood-the kidneys combination. And so he is; indeed, the found for accomplishing this which can missioner's letter to the Secretary published inhabitant is far stranger than habitation. He is a Norwegian Mormon, fifty acts directly upon the seat of the disorder; years old. So far from having numerous wives, he has no wife at all, but steadfastly keeps a promise which he made more than thirty years ago to a ble success which Warner's Safe Cure has girl whom he married on her death-bed that he would never marry again. He sonage than Dr. Robert A. Gunn, Dean of lives entirely alone, and admits that he York, and the fidelity with which they sioner of the General Land Office, Hou is oppressed by the solitude of his home, have carried out all their promises to the N. C. McFarland, in his annual report, states that the disposals of public lands during the year embraced 19,030,769 acres, and Indian lands 390 225 acres an increase of the solution of all rheumatic troubles, especially acute, and Indian lands 399,235 acres, an increase urged him to take that straight road to knowing full well that the demonstrated over 1882 of about 5,000,000 acres, and over salvation, but the recollection of his power of the remedy justifies them in so promise has always interposed.—Salt doing. Nothing can be fairer than this, Lake Tribune.

A Oneer Pet.

One day last week a lady residing on Chapel street, in New Haven, saw, on going into the garden behind her house, a snake about four feet long coming toward her. She screamed and ran, thus attracting the attention of a gentleman, who killed the reptile. It was a beautiful creature, and a person who saw it said it was of a rare variety. While wondering how the serpent could have reached so thickly a settled part of the Dr. Pierce's "Favorite Prescription" would city, and be found so far from the woods and fields, the wife of a German physimade or procured to be made to a great ex- cian, who lives around the corner from tent for speculative purposes. He renews | the lady's house, came up and inquired in tones of great solicitude if any one law be repealed. The report recommends had seen her "pet snake," and when the amendment of the Homestead laws, she discovered its dead body she was loud in her manifestations of grief and anger. She, however, become more resigned, and carefully gathering the remains in her arms she walked away lamenting and talking to the dear one, ommends the total repeal of the Timber now dead, in a cooing manner, and call-Culture law on account of its inherent de- ing it loving names .- New Haven Reg-

A HUMAN FIRE.

The Phenomenon of a Burning Mine Re-

peated in the Physical System. A few years ago one of the most important coal mines in Pennsylvania caught fire. It started slowly but soon obtained such headway that it spread through the greatceipts this year are estimated at \$120,000,000 that it be opened. The Chinaman de- continued to increase. At that juncture a During the first three months of the current clared that he had forgotten the combin- young man stepped forward and suggested fiscal year the revenue decreased \$7,- ation. That night the safe, weighing that all the entrances and vent holes of the 926,401. As a large number of those four tons, was taken out of the bonded off the supply of air. His advice was folengaged in illicit distilling are desirous of warehouse, carted away several miles, lowed and the flames were finally subdued. To compare the condition of this mine with many phases of the human system, is most natural and appropriate. "Fire in the blood" is not a mere expression, it is a nesty to such persons. He suggests that with opium. A man had a contract for most serious fact. How it originates, it washing the linen of the Pacific Mail may be impossible to say; but that it burns tion for the prosecution of offenses against steamers. Hundreds of bundles, each and rages with an increasing fury, the one revenue. The question of enforcing the containing a can of opium, were pitched who is its victim only too painfully knows. The blood is the life. It is designed by nature to purify, strengthen and sustain the referred to Secretary Folger for action. The and carried away to his laundry. He system. It is too often made the channel number of stamps issued to collectors and happened to be sick on one occasion, through which poison and death are transported. Poisonous acids coming through the veins and arteries inflame and cause a fire just as real as the one which existed in the mine. They burn and irritate, causing the brain to become weak and the nerves unstrung; they carry pains to the muscles and leave agonies in the joints; they bring destruction instead of strength; they devastate the very portions of the body that amount of rebate claimed on tobacco was Opium has been delivered in the Islands | most require help, and they hasten the approach of death in its most horrible form. These things have been felt by innumerable people who have been the victims of rheumatic disorders, and the agonies they have endured confirm this description. There is but one way by which this fire

in the blood can be extinguished, and that is by shutting off the supply of these poisonous acids. The lactic, lithic and uric acids come in to the blood through the liver and kidneys, and they remain in solution in the blood producing inflammatory rheumatism, sciatica, lumbago, neuralgia, gout and all rheumatic fevers and affections. When they are deposited as gritty crystals in and near the joints, they cause articular rheumatism; when in the muscles, muscular rheumatism and lumbago; when in the tissues covering the nerves, sciatica; when in the face, head and nerves generally, joint and become chronic, or suddenly atand liver; and no means have ever been it extinguishes the fire by controlling the supply and removing the cause. The well known standing of H. H. Warner & Co., of Rochester, N. Y., the remarkathe United States Medical College, New and those who suffer in the future from rheumatism with such an offer before them, do so on their own responsibility, and can blame no one if living pain and untimely

of the continued use of mercury and potash for the treatment of Blood and Skin di eases—they never cure, and nearly always injure or totally ruin the general health.

A WELL-KNOWN DRUGGIST.

I have seen a great many cases cured with Swift's Specific—some who had tried all sorts of treatment. In fact, I have never known it to fail when taken properly. I sell a large quantity of it, and for all diseases that are dependent on blood poison or skin humor. It cures PIMPLES AND BLOTCHES ON THE SKIN, and makes the complexion fair and rosy. As for blood taim, there is no such word as fail. It cures cases that have long withstood other sorts of treatment, and without any of those recurring troubles that generally follow mercurial and other so-called cures.

Worn, Weary, and Wretched.

"As weak as a cat" is an expression frequently used by debilitated sufferers who are trying to tell how forlorn they feel. It is an incorrect expression, for a cat is one of the most agile and vigorous animals in existence. It would be more correct to say, "as weak as a limp old rag," for that gives the idea of utter inability to hold one's self up. The weary person who feels thus is generally worn, worried, woeful, and wretched.

Sometimes it is a case of overwork, and sometimes of imperfect nourishment. The blood in the system of a person who is "as weak as a rag" is in a wretchedly thin condition. It needs iron, to impart richness, redness, and strength. This is to be had by taking Brown's Iron BITTERS, the only safe and proper preparation of iron in connection with gentle and powerful tonics. The physician and the druggist can tell the worn and weary how valuable a remedy Brown's Iron BITTERS has been found in actual

JOHNSON'S ANODYNE LINIMENT

To the Farmers, Stock-growers, Fruit-raisers, Poultrymen, and Horticulturists of the Great Southwest.

on November 22d, 1883, the Journal Company of Kansas City, Mo., will begin the publication of the "Kansas City Weekly Journal Company of Kansas City Mo., will begin the publication of the "Kansas City Weekly Journal And Agriculturist", "an eight-page, seven column paper, in size larger than any other agricultural or stock paper in the country. The object to be gained by this movement on the part of the "Journal Company" is to secure, and especially to produce for the States of Missouri, Kansas, Nebraska, Iowa, Colorado, Texas, Arkansas, the Indian Territory, and New Mexico a first-class standard agriculture and family newspaper.

The Weelky Journal and Agriculturier and family newspaper. The world for the preceding seven days, carefully edited by a thoroughly competent man. Second, National questions and topics local to the Great Southwest, will receive careful editorial treatment from a Republican standpoint. Third, Under appropriate heads, the subject of farming, stock and sheep-raising, and poultry growing, cultivation of fruit and flowers, will be treated by editors specially trained for this work. In short, we devote ten to twelve columns of original matter weekly, on the subject of Agriculture, Horticulture, Stock and Poultry papers of Europe and America, that the readers of the "Journal And Agriculturist" may have the benefit of these great papers through the columns of the "JOURNAL AND AGRICULTURIST" Firth, Judicious articles expressly written or selected for the Boys and Girls, will also be a leading feature. These articles will be similar to those which now make "Peck's Sun," "Texas Siftings," and their class so interesting to the "young folks." Sixh, Original stories, written expressly for the "JOURNAL AND AGRICULTURIST" will constantly appear. Home Interests and the Family will receive careful attention by able writers; so that our aim to produce a family paper, devoted to "Science, Literature, Agriculture, Horticulture, Stock and Poultry raising, and general Home Interests 'will be fully accomplish

TERMS OF SUBSCRIPTION.
